Description and Objectives

This class will familiarize students with important historical developments and contemporary expressions of religion in Latin America. We will focus on three major cross-cutting themes:

- 1) The comparative study of religious ideas and practices. For example, how can we evaluate the ethical dimensions of institutions such as human sacrifice in pre-colonial Mesoamerica from our contemporary Western position? How can we understand the syncretic processes and results of colonial religion in the face of the power dynamics associated with the conquest? And how might we sift among the ideological, religious, and intellectual frameworks seeking to explain current religious diversity and change?
- 2) The relations between religion and social change, including the role(s) of religion in encouraging, directing, and/or suppressing efforts to alter political structures; the relations between individual transformation and wider social change; and the ways that different social groups draw on the same religious symbols and rituals toward varying social and political ends.

3) The strengths and weaknesses of various theoretical and methodological approaches to religious life in Latin America. We will discuss varying ethnographic models and also examine problems related to the scarcity and ambiguity of many historical sources. Tied to this will be discussions about primary sources, including fiction, visual art, oral histories, and church documents, and also about researchers' relationships to their subjects and materials.
